

CIS342 Systems Programming

Instructor Information

- Dr. Yuzhe Tang (ytang100@syr.edu)
- Office: CST 4-193
- Office hour: after class (M/W 6:30pm-)

Textbook

- Textbook (Optional):
 - "Computer Systems: A Programmer's Perspective," Randal E. Bryant and David R. O'Hallaron
- Lecture notes

Course Objectives

By the end of the semester, you should be comfortable enough with C and C++ programming in Unix environment. Reading and navigating a large software system written by others without being intimidated.

Prerequisites

- ECS102 or a semester of a programming course

Grading

- Class participation (10%), Homework (60%), Exams (30%)

Course Outcomes

Being comfortable in the Unix programming environment:

1. Setting up clean-slate Linux in virtual-box
2. Bash and vim
3. Basic C/C++
4. Gcc, makefile, and gdb
5. Concept of syscalls
